Continuation of 2. NOTE: The amendment broadens the claim by deleting a step limitation. The broadened claim would require further consideration by the examiner. However, in the event the amendment is entered, it is the examiner's position that the rejection cited in th final rejection would be maintained. The claim does not exclude curing steps. The reference cited teaches applying a dissolved polyimid to a substrate and heating the material, while the secondary reference teaches dielectric materials cast directly onto the integrated circuit substrate. The method taught by the combination of references meets the claim limitations.
